THE STORY

*"When the shadowed veil returns to mask the midday sun
The Fire of Serpents will rise again; Five shall become the One.
The elements now heed his call, and hope is born alive;
We will have our peace once more when One becomes the Five."*

Once upon a time there was a great warrior. This warrior, MAGI, owned the most extraordinary suit of armor and six of the most beautiful swords the world has ever known.

The armor was impervious to all but the strongest magic. The swords were forged of ores that came from deep within the earth and five of them had been enchanted with the powers of the Elements. The last sword is a mystical blade, cast of a powerful, unknown metal. It is the greatest sword of all. It is TORES! For over 500 years, since the end of the Great War, the power of this great armor and those swords have kept peace throughout the land.

Darces the Dark, an evil Overlord, led the evil uprising that became the Great War. Magi defeated him and Darces was exiled to a land far away. But evil does not rest! Those forces have been marshalled over these long years by the dreaded Darces the Dark. Magi was fatally wounded in the battle. While the great warrior no longer lives, his swords and armor do!

It is your quest to find the five Elemental Swords of MAGI, secure TORES, defeat Darces and return peace to the land.

THE PARRY

The Parry

Many monsters are very hard to fight, but there is a way to defeat them! The parry is a long practiced art of evasion.

To Use the Parry:

- Turn away from the enemy as soon as you attack. You can turn to the side, or back up several steps. Retreating is very useful when battling a strong enemy on the other side of a door.
- Use the **parry** to eat and drink, use potions, change magic spells, or switch weapons.

GUIDE FOR NEW ADVENTURERS

- The Old Man of Granville has a gift to start you off on your journey.
- The Wizard of **SURA** is master of the Water Magic. This power is good for attack and defense. A spell of nine vertical lines creates a temporary shield which will protect you from many monsters.
- Immediately north of Granville is Castle Grades. The King and Queen have much to tell and gifts to give - so this is a good place to start. Stay within the walls of the castle until you find them.
- Return to Granville - visit the Armorer and trade your short sword for a stronger weapon. Next visit the Inn Keeper to save your progress. Go outside and fight some Cobras to gain experience, but stay close to the city walls.
- Continue your quest by travelling to Deirus, but be sure you stop in the town of Gran to buy food/drink for your travels. Gran is northwest from Castle Grades.

GUIDE FOR NEW ADVENTURERS (continued)

- The flies can be fierce on the road to Deirus. This would be a good time to practice your parry.
- In Deirus, you will hear of Sara Spring, which lies north of the town. Go there and receive the first Elemental Sword. Return to Deirus and save the game.
- North of Sara Spring is the Sanctuary at Selle. Enter the maze and make your way down to the statue of Bildevance. A powerful force will envelop the sword. Return to Granville and let the Wizards examine it. One of them has important news!
- The adventure is just beginning. Good fortune go with you, and don't forget your graph paper!

CASTING MAGIC SPELLS

Each Wizard has mastered a certain type of magic. When you meet a Wizard, he will give you the four basic elements [e.g. ● | — ○] of his mystical studies. Using one or any combination of these four symbols, all of the spells of his magic can be cast. Other Wizards will not give you additional magic symbols unless you present them with one of Magi's five Elemental Swords.

When symbols from one magic are combined with symbols of another magic, new types of spells can be created. There are literally hundreds of spells possible for a master magician who has passed the scrutiny of all the Wizards.

It is important to remember that the source of all magic is the life force of the user. Therefore, each time a spell is cast, some life energy is depleted from your Health Points. Hence, the more powerful the spell, the more Health Points you are likely to lose. Some spells are good to use in combat, while others are informative or replenish vital functions. Still others perform astounding feats.

CASTING MAGIC SPELLS (continued)

Like any good practitioner of the magic arts knows, a bit of practice early on may prove invaluable down the road. Though there is not really a wrong choice, the game will flow more smoothly if you select the appropriate Wizard to teach you.

There are many spells to attack and defend against various kinds of enemies. Legend has it that a certain incantation can actually break open the ocean. It is also said that a certain mixture of Magic Symbols gives you the power of flight.

As every master mage is aware, there may be more than one way to cast a spell. If you are void of a certain symbol, you may be able to use another spell altogether to accomplish your goal.

We suggest you begin your game by visiting the Wizard of SURA, or Water Magic. SURA is mainly a defensive magic and will allow you more time to wander through the outside world, defeat enemies, gain experience, and discover the full breadth of the Island Grades.

CASTING MAGIC SPELLS (continued)

Here are some basic spells to help you get started.

Opens Dungeon Doors

Cures Paralysis

Cures Poison

Protects against Physical Attack

Protects against Magic Attack

All great sorcerers keep meticulously correct records of their spells, so be sure to maintain an accurate log when you mix untried symbols or cast untried spells.
